Note:       Some customers have used abbreviation.  
          *PP* stands for *Primary Particle(s)*  
          *PPB* is to mean *Primary Particle Beamer*

# Introduction

## *A Word from the Editor*

Dear Sirs, dear Madams

I am very delighted that I can present you with this collection of customer accounts that were written about our products. Especially in today's hectic and fast moving world, it is very special to receive written feed back. On the telephone, well that is a different story. Many people give me lengthy and detailed product feed back over the phone, sometimes for over an hour. Unfortunately when it comes to written feed back, the number of volunteers dwindles for some reason. Viewed in this light, I am extremely grateful and proud that I am able to share this large and detailed collection of feed back accounts with you. Some of the reports you see printed in this booklet were over twenty pages long and had to be cut down to a manageable size. Perhaps it is the effects of our products that some many accounts have been sent in, who knows? Many of the accounts mention that everybody is more relaxed and that time slows down.

Whatever the reasons may be, I would like to thank all those people who sent in their feed backs and thus made this booklet possible.

Each new edition will only consist of a small number of copies (approx. 200-500 copies). The reason for this is simple: We would like to up-date this booklet with new customer feed back-accounts every half year or so. We are hence very grateful for any written material you can let us have. This can be about any of our products, even one that you have already written about in an earlier edition. Just mention that this is a continuation of an earlier account and we will print them one after the other.

**The spiritual extends its gratitude to us all.**

Again and again the spiritual world lets me know that its work is made simpler, when we work with devices that attract and bind Pri-

mary Particles. Angel of love and peace find it very difficult to manifest long lasting peace and true love in a world that is increasingly burdened with pollution and the hustle and bustle of modern life. Your Guardian Angels are grateful to you, whenever you use products that manage to attract and bind Primary Particles. It makes their lives easier and enables them to work with you and help you.

Some people do not feel that they have been successful enough in life, hence are unworthy and deserve no help from the spiritual world. Don't be shy. The spiritual world helps everyone and especially the people who need it most. Just try your Guardian Angel, when you find yourself in a difficult situation, when you see no way out and cannot come up with a solution. Ask for help. You will be surprised. Your Guardians like nothing better than being able to guard you!

Richard Weigerstorfer

## ***Wu-Wei Products, a Credo***

Wu-Wei ltd is a small family firm that produces and deals with esoteric energy products and esoteric literature. We are situated in Regensburg, a historic town in the South of Germany near Munich.

Most of our products are hand-made and were developed by Mr Weigerstorfer, the founder of the company. Many of the items that you can find in our range, we create on site.

It has always been our aim to use top quality material for our goods which are produced by highly skilled staff in environmentally friendly production-methods. For us at Wu-Wei ltd the human input in the production-process is very important, as we believe that the positive energy of our staff leaves its signature in the energy field of the products.

It is our goal to enable the Spirit World through our energy products to get into close contact with each one of us and with our specific energy fields, hence allowing our spiritual guides and God's love-energy to help us in achieving an elevation of our overall energy patterns. Most of the items in our range and especially the Primary Particle Products can elevate the energy composition of a person to such a level as to allow the spiritual forces as a whole and in particular the person's spiritual guides easy access to his/her energies. In other words, through our products we are enabling your spiritual helpers to get into close proximity to you.

When Mr Weigerstorfer develops a new product, he works to the instructions of the Spirit World itself. He has years of experience in dealing with the Spirit World. His life-long practice of meditation and trance has led to a close collaboration between Mr Weigerstorfer and the Spirits, in particular St Germain. When Mr Weigerstorfer works on the creation of a new energy product, St Germain shows him, if he is following the right path by illuminating the particular device that Mr Weigerstorfer is developing and working on at that particular moment. When St Germain and the Spirit World are pleased with his efforts, the item starts to glow.

When he goes off on a tangent and strays off the right path, the glow decreases or disappears completely depending on how far Mr Weigerstorfer's thoughts and ideas have moved away from what the Spiritual World had intended.

Like many of us, Mr Weigerstorfer was looking for his place in life as a young adult. He could not find the answers he was so desperately looking for in the ideas and theories that modern society could offer him. One night in the late 1970s he had a dream: He was lying on an air mattress out at sea enjoying the up and down motion of the air bed that was caused by the waves. He was to have this very same dream every night for several months. At first he did not know, what to make of it. Then suddenly the idea of the Bio-Wipp Trampoline, which was to emulate the up and down motion of the air mattress, was born.

Things happened very quickly after that. In 1978 Mr Weigerstorfer founded Wu-Wei ltd. It all started as a one-man enterprise which Mr Weigerstorfer operated from home. One year later the company moved onto larger premises which consisted of one office and one workroom. After Mr Weigerstorfer had established contact to Glenda Green and after further meditation, the Spiritual World allowed him to learn about the Primary Particles. This led to the creation of the Primary Particle Products. Now things went from strength to strength. In 1997 Mrs Weigerstorfer joined the company, which gave her husband the opportunity to devote more time to the improvement of old and the creation of new products under the guidance of the Spirit World. In 2005 we opened up to the English speaking market. This allowed Mr Weigerstorfer to increase his staff. Our team currently consists of nine people, most of whom are full-time employees.

In the future the company will start up self-help groups. In addition we would like to be able to offer our energy products to more and more people world-wide in order to make it as easy as possible for the Spiritual World to help all of us across this planet in finding

happiness and self-fulfilment in an energetically improved and elevated world.

The Wu-Wei team wishes you much love and light and a great deal of success in gaining internal peace and freedom.

The Wu-Wei Team

## ***Lena Lieblich Speaks About ‘Primary Particles’ and ‘Primary Particle Products’***

‘Primary Particles’ are the smallest building block in God’s creation. Let me explain: For his creation God has set free an infinite amount of energy particles. If these particles are not yet attributed to a being or claimed by a soul, we call them ‘Primary Particles’.

Perhaps you can imagine it like this: The oceans and seas of the world are home to a seemingly infinite number of water drops. There are so many water drops that we would not even dare to count them. In turn, every drop of water consists of an incredibly large number of water molecules. There are at least as many ‘Primary Particles’, as there are drops of water in this world. As we know, every human being has been given the opportunity to make use of everything at his or her disposal. However, let us assume a particular human being was to do nothing else all day long but to attract and bind ‘Primary Particles’ to him- or herself. At the end of this person’s life the amount of gathered ‘Primary Particles’ is comparable to that of a thimble of water in relation to the vastness of the Earth’s oceans.

### **The Two Special Qualities of ‘Primary Particles’**

Firstly, ‘Primary Particles’ only react to love. God is pure love. Hence his energy consists of nothing but pure love. This is the reason, why ‘Primary Particles’ will only interact with energies of a similar nature.

Secondly, if a person’s pure love has managed to attract and bind a ‘Primary Particle’, it will always stay with and serve this person for ever. It will manifest itself according to its owner’s wishes.

### **You Wonder: “Why Do I Need ‘Primary Particle Products’?”**

The answer to this question is simple. We, the individuals, who collectively make up the Western Cultures, have lost our confidence in the knowledge that we are God’s children and have forgotten that we are loved. Even today the State Churches contribute to our misinterpretation of the world with their teachings of guilt and the original sin. These doctrines have been and still are continuously

re-enforced, only in order to make it easier for the social elite to rule us and exert power over us.

A mother will always love her small child. If this child shatters a drinking glass, the love the mother feels for her child, does not diminish. Why then should God withdraw his love of us? Believe me, God has never wasted a single second on thoughts about punishment or sin and has definitely never intended to turn us into prodigal sons and daughters. You can believe me: I could hardly stop myself from crying tears of joy, when I was allowed to take a small glimpse at God's love. A mother would never condemn her child, so why should God do so?

Please do not think of me as an over-emotional religious fanatic. Having brought up four children, I have both of my feet firmly on the ground. Yet let us return to the question "Why do I need 'Primary Particle Products'?"

The answer is simple, "...because God has given you your free will and hence the option and the opportunity to work with 'Primary Particle Products', in order to bind and use 'Primary Particles'."

People who think of themselves as unworthy and sinful prohibit the divine energies from flowing and disturb their connection to God. Here the 'Primary Particles' act as a bridge between the divine powers and the person using the 'Primary Particle Products'.

In certain situations we might feel sinful, when we should feel loved and wanted. As a result, we are likely to fall into the role of the victim. We feel very small and insignificant and can not imagine that we will ever be able to actively change our individual situations. Unfortunately, our higher-self is also unable to assist us in this case. The higher-self is the part of us that has decided to remain in the spirit world with the aim of guiding us back to God. Resulting in our low self-esteem and low self-confidence our connection to God and the spirit world is blocked or even cut. Tragically, the situation described here, mirrors the dilemma that most of us have to contend with on a daily basis.

Yet there is no need to despair. A close friend of mine, Richard Weigerstorfer, who is a man that has found his true calling in this world by serving the divine energies to the best of his ability, has developed the 'Primary Particle Products'. All of his creations are guided by the spirit world, especially by Saint Germain.

You might ask me: "What is this spirit world, you keep on referring to?" Well, Richard has described it to me as a collective union of Our Lady Mary, Our Lord Jesus Christ, all higher-selves, spiritual guides and guardian angels.

When Richard develops a new product, he works to the instructions of the spirit world, which shows him, whether he is following the right path by illuminating the device he is developing at that particular moment. He told me, when the spirit world is pleased with his efforts, the item he is developing starts to glow. However, when he goes off on a tangent and, as people say, barks up the wrong tree, the glow decreases or disappears completely.

In the case of the 'Primary Particle Products', the difficulty for Richard was to create a tool that is able to close the gap between one's higher-self and the highest available spiritual frequency of any given situation, in which a person might find him- or herself.

As a result of our lack of self-esteem, these situations are often characterised by a generally low level spiritual energy.

The problem is that one's higher-self is unable to slow its energy patterns down to a level, which allows it to materialise in the physical world. At the same time, however, the slow negative energies that most of us subject ourselves to, are not quick enough to connect with the energies of our higher-selves. The 'Primary Particle Products' have to therefore bridge the distance between the physical and the spiritual world, in order to close this gap.

This process is only possible, because the energy patterns of the 'Primary Particle Products' are interactive rather than linear. The difference between 'Primary Particle'-inspired products and products that emit a linear energy is immense: 'Linear Energy Products' will transmit a constant stream of energy, whether the recipient needs the

energy at that precise point in time or whether he or she could easily manage without it. Naturally this can lead to an overdosing on a particular energy (this is sometimes called over-energisation) or it can result in an energy-jam.

Due to their interactive energy properties, this is not the case with the 'Primary Particle Products'. 'Primary Particle Products' will draw away any negative energy on one hand and supply the recipient with the right amount of positive energy, when needed. In other words, the 'Primary Particle Products' react to the recipient's energy needs and change the amount they release accordingly. This means that the 'Primary Particle Products' will always have a harmonising effect on the energy patterns of each individual recipient. This is what makes 'Primary Particle Products' so special in comparison to other energy products.

Lena Lieblich

# Energy Pendulum Mary

## **Karin W.**

I would like to tell you about the Energy Pendulum Mary (gold).

I am a life coach and use the pendulum constantly. It is a source of energy, which supplies its user with additional energy. This causes an energy feedback and regeneration. Mary's energy is much stronger and caring than the energy of other Energy Pendulums.

## **Regina Z.**

Meditation with the Energy Pendulum Mary.

Pendulum Mary emits very fine, gentle energy, which nonetheless is extremely powerful. This wonderful energy emission allows a vast amount of love to flow through the pendulum.

I can feel the notion of confidence very strongly, yet still so softly. I feel surrounded by this energy and I feel blessed.

The great power of tenderness develops its potential through this pendulum. Pendulum Mary is like a canal which this wonderful energy uses in order to flow into our dimension. It functions like an open portal, which enables us to receive this beneficial energy with ease.

The Pendulum offers us energy to patch the holes with, which our deficits have left. This works for people as much as it does for Mother Earth and all her beings and creatures, as the pendulum fulfils the task of relaxing the strong tensions between the two extremes in our world of duality. Its healing, equalising nature leads to a convergence of the two poles of this duality and thereby allows opposites to accept, even attract each other rather than repel one another.

Pendulum Mary is a bringer of peace. Its energy leads you from prevailing chaos and into the divine order of things.

It is hence important to feel humility and pure love when working with the pendulum! Pendulum Mary brings us the blessing of the divine mercy. I would like to extend my thanks to all our divine friends and especially to Mr Weigerstorfer.

**Anita K.**

I have received the Pendulum Maria two days ago and it has since hardly left my hands. Immediately when I opened my parcel, I felt a very soft, feminine and warm energy taking hold of me. It is hard to describe, but the energy felt so – caring.

Working as a healer I have used the pendulum today for the very first time in one of my sessions. (...) So far when I wanted to transfer energy information from an object to a person, I had to place one hand on the person, while holding the object with the other. With the help of the pendulum everything was so much easier. It felt more like a game than like work. As I did not have to concentrate as much as before, it left me more time and energy to get a feel for the actual energy transfer. Using Mary as an aid, I managed to produce two energy-transmitters, two mandala pictures and two colour rays for my friend Louise U. Each time the energy transferred felt different. When I spoke to Louise about the energy transfer, we compared what each of us had felt. Both of our experiences were completely identical. We had felt exactly the same at exactly the same time. This is very unusual for me, as I normally start sensing and feeling the energies before my patients, who are lying on the couch before me, do.

We both felt pure love during the process, after which we were energetically charged and programmed. We felt like we had been flooded with light.

I am certain and without a doubt that the name Energy- Pendulum Mary is a worthy name for this little yet potent gadget. I cannot help thinking that there is some divine motherly force that aids the pendulum's work. I feel all warm inside when I imagine that this force is possibly coming from Our Lady Mary the mother of the Lord. When I visited the Mary Chapel in Todtmoos, Black Forrest in Germany,

I had felt and seen the same energy which was present during the session with Louise. The whole chapel was saturated with this white energy. You can also feel this energy, when the Ave Maria is sung or, of course, when you work with the Energy Pendulum Mary.

# Primary Particle Beamer

## **Anke-Maria M.**

I do not know how the Primary Particle Beamer works. The effects of the Primary Particle Beamer I can however see, feel, experience and detect. Before working with the Primary Particle Beamer, I found it necessary to get some information about the beamer beforehand and I watched the video (publisher's remark: Currently available in German only!). After that I welcomed my Primary Particle Beamer in a solemn ceremony and named it 'Rafael'. Then the work with the beamer started.

### Physical Pain:

When I suffer from a headache, I take a glass of water and ask 'Rafael' to turn this water into a cure for headaches. Then I hold the beamer's flat end against my forehead enabling the beamer to read the energy information pattern of my headache. The pointed end of the beamer energises the water in such a way that it now has all the properties to cure my headache. I then drink this water in little sips throughout the day. I also irradiate my solar plexus with the Primary Particle Beamer for a further ten minutes and my headache is gone.

Whenever I am hosting a seminar or a meditation evening, I ask 'Rafael' to cleanse all energies and to fill the room with light, love and peace. Then I can be sure that all participants feel comfortable and the sessions are pleasant, beneficial and caring.

I even irradiate my food and my drinking water and ask for purification and good energies. After that, apples, even simple tap water tastes better.

As I am very sensitive, I had real problems coping, if I had forgotten to surround myself with a protective light mantle before going out shopping for example, when being surrounded by crowds of people or when watching an exciting TV-drama production.

Now I can always rely on my great aid, the Primary Particle Beamer and my angel 'Rafael'.

**Bernhard Sp.**

I received the Wu-Wei Primary Particle Beamer just before Christmas. I would like to tell you about my experiences that I have made with my new beamer.

Our house is situated in a little wooded area, which is part of our 30 000 square metre property. Unfortunately there are several wind turbines and mobile telephone mast in close proximity to my grounds. The disturbances caused by them are detectable and measurable (...). I articulated my problem to the Primary Particle Beamer and asked it to rid my property of all pathogenic radiance. (...) At once I could detect very positive, constitutive life-energy. At once satellites, wind turbines and mobile telephone masts were no longer traceable. My Wu-Wei Energy Tensor could not pick up even the slightest sign of electromagnetic pollution, technical and geopathic disturbances. The situation is now much better than before, when I still used other methods to solve the problem. (...) The pendulum turned clockwise, when I tested the tree on our side of the fence, which was displaying no negative energy readings. The picture was completely different, when I tested the neighbour's tree, opposite our tree, yet on the other side of the fence. This time the Energy Tensor turned anticlockwise indicating the presence of pollution. (...) The positive and constructive energy which the Primary Particle Beamer emits surely is helping the harmonisation process of all energies within a certain area tremendously.

**Heike K. Z.**

First I would like to thank you for the production and the distribution of the Primary Particle Beamer. (...)

I own a Primary Particle Beamer since autumn 2005. I first constructed a list of energy-medication rates. I also attached detailed information about specific medical conditions and illnesses.

Then I tested whether the rates and information sheets were comprehensible. For this I used a pendulum. (...) I first asked all angels, then the specific angel that is attached to my Primary Particle

Beamer to create a remedy for a particular ailment and its symptoms. I deliberately said the word 'please', my name, address and date of birth. In addition I included the illness's medical name and named all the symptoms I wanted to be treated. I normally place a glass of water or some globules in front of the Beamer for this purpose. Then I usually read all rates out aloud and include some more requests, which I call "General Requests". I normally include them each time, when I use the Primary Particle Beamer, for instance when creating cures for chronic illnesses. Depending on the individual I raise or reduce the number of "General Requests" such as "I am asking for the acceptance of healing energy on all energy levels of the body". This prohibits a possible therapy reversal, if the reason for the medical condition is of a spiritual nature. "Please send us divine energy". This "General Request" is always useful, as anything will only work well with divine support. "I ask for a harmonious and gentle healing process without complications which is consistent with the divine order of things", always combats the problem of pain caused by the healing process. Similarly I request "optimal reduction of all pain that may be caused by the healing process" for the successful treatment of patients who have a tendency to react with feelings of pain or for people who suffer from tooth ache and neuralgia. It is important to include a "Thank you" at the end of each request.

### **Philippe M.**

Digestive disorders during 5 months, treated with antibiotics and anti-inflammatory drugs with no result. Lab test revealed a count of 56 of CRP (C-reactive protein, an indicator for inflammation).

I diagnosed liver and pancreas inflammation.

1st treatment: - PPB beamer on acupuncture points Liver 3, Pancreas 3 and Gall Bladder 20 (for inflammation) also Wu-Wei Tree Acid Foot Patches 5 nights.

Result: CRP: 22.

2nd treatment (the same) a week later. Result: CRP: 11 (normal: 5). No more digestive problems.

### **Bernard M**

Diagnosis: glaucoma. Intra-ocular pressure: 21mm Hg. A single treatment: - Primary Particles (we used aluminium buttons charged with PPB and PP discs) on acupuncture points Liver 3 + Pancreas 3 - PPB on ocular points ciliary bodies, cornea and iris (these points were discovered by Dr Reinhold Völl) - kinotakara patches of the reflex zones on the sole of the feet.

Result: normalization of intra-ocular pressure: 15mm Hg.

### **Nguyen van D.**

Diagnosis: arthritis of right hip, knee and ankle. 2 treatments with PPB and appropriate diet to correct acido-alkaline imbalance.

Result: no more pain.

### **Michel E.**

Diagnosis: prostate hypertrophy, waking him 4 to 5 times each night. 2 treatments with PPB on acupuncture points Conception vessel 3 and Liver 3.

Result: gets out of bed only once each night.

### **Valérie C.**

Diagnosis: hirsutism. Radionic (distance) treatment with PPB on a sample of her hair during 3 months.

Result: stabilization: less facial hair growing less hair loss on her scalp.

### **Virginie D.**

I had good results with the PPB on a dog that fell of a wall and had to be operated. I treated him with PPB (distance irradiation) and had very good results. I used some of his hair as a witness. It seems Primary Particles are very efficient. Nhiep T. has never had such good results before in his treatments. It seems they are better for treating infections or inflammations (when you have too much heat as the Chinese say). Aluminium buttons charged on both sides with

PP Violet Discs and put on acupuncture points are excellent. And PPB is very good for distant treatment. When you catch a cold, they are less efficient - it seems (...) pp energy is a "cold" energy. (...)

**Dr. Tran N.**

The Primary Particles are far more efficient than any methods I used in the past on acupuncture points, such as needles, electricity, sounds, colours, laser (...).

The PPB is a wonderful tool.

The PP Violet Discs are great for food, beverage and sleep and the Wu-Wei Tree Acid Pads are matchless as far as detoxication is concerned.

I am waiting to test your "Broad Beamer" and "ORa Angel Tray".

I am grateful for your achievements in Science and Technologies and your contribution in the progress of Medicine.

# Primary Particle Glass Products

## **Rolf v. d. K.**

I would like to give you a spontaneous feed back about my last order. I had already bought a Primary Particle Glass Product GEO in order to eliminate an under ground water course. It also helped my wife, who suffers from an overactive thyroid gland.

I then bought another GEO glass house for my daughter, who is also plagued by underground water courses. There was a certain area in her living room, where my daughter always felt edgy, which led to her avoiding this spot. Her two cats on the other hand loved it and spent much time there. Last Saturday, after she had found a suitable spot for GEO, something really strange happened: Her cats no longer seemed to feel attracted to this spot, whereas last Monday my daughter said that she felt really comfortable, when she sat down on a chair in that particular area she didn't like before. Yesterday she rang especially, just to tell me the good news.

She has a very sceptical nature and didn't initially believe in the power of GEO. The effectiveness of the Primary Particles have been proved.

## **Anonymous**

I am a developmental engineer and I work with micro processors. In my firm and especially where I work, there are many high grade energy sources, so for example wireless transmission stations (2GHertz), monitors and computers.

For this reason I have placed ELO next to my monitor and GEO on my desk. Right next to GEO I keep three bamboo branches in a cylindrical vase that is filled with pebble stones. Just in the last week, the bamboo branches shot up 30 cm. The only nourishment they get is water. Obviously GEO has proved a great friend to my bamboo shoots.

I have become much more organised in the way I keep my desk. I manage to deal with most of my e-mails within a day now, which I then sort into the relevant sub-folders.

I have made these experiences with your products in the last three months. I would like to wish you much success with future products.

**Tuoc P.**

Thank you so much for sending me the newly proofread copy of the 'Instructions for the Primary Particle Glass Products.' I feel very honoured to be one of the first recipients of this finished piece. With the choice of light green in background colour, the glowing-effect of the PP glass pieces really stands out. As you explained in an earlier documentation, if these products are in tune with what they are meant for by St Germain and the Angels, they would glow! And they actually do! I congratulate you and your team at Wu-Wei on achieving such an effect, even on printed form. My team in Paris and myself are still experimenting with the uses of these PP Glass Products and acknowledge the powerfulness of them through various uses. We truly enjoy using your products and hope that this is only a beginning of many more transactions in the future.

**Regina Z.**

I ordered my first Primary Particle Glass Products (All Strong Six Glass Products) in early September 05. I wanted to have GEO for my flat, which includes my therapy room. The cube ELO I place in my fuse box. The other four Primary Particle Glass Products I wanted for my personal energy work and for my patients. Before my children and I moved into our new house, I had asked a dowser to tell me where energetically the best place for the children's and my beds was. Yet it was still important to me to further harmonise the house's energies with the appropriate Primary Particle Glass Product.

I live on the first floor of my parents' house, who live on the ground floor. Straight after receiving the parcel, I told my mother how GEO and the ELO cube work and how precious they were.

Despite being a little sceptical at first, she then also decided to get herself a GEO, in order to energetically cleanse her part of the house. A few days later she was the proud owner of a Primary Particle House Blessing. Two days after that she suddenly came running to me. She was very excited and told me that she had just taken a bath, when she thought to herself that something seemed different. Yet she couldn't figure out, what it was. Suddenly it came to her: Her legs didn't feel heavy anymore. No longer did she have to rest them on the bottom of the bath, but could lift them with ease. (...) She was so excited that she could not quite get her head round it and she was joking that her legs would become so light that she would be able to fly in future. (...)

My mother is normally quite a sceptic. Yet her personal experience was so convincing that she was totally convinced about the effectiveness of the Primary Particle House Blessing. She said to me: "You know, you could also get me ELO for my fuse box. If the Primary Particle House Blessing does such a good job, then the cube can't do any harm either. It is obvious that the Primary Particles did a convincing job here.

A patient of mine, who tends to be very sensitive and perceptive to the energies around us, came to a one to one consultation session. At that moment she was suffering from a migraine attack, which we wanted to address. While we were sitting opposite one another talking, she spontaneously pointed to my four Primary Particle Glass Products (UR- 1, 2, 5 and 6), which I always kept in easy reach. She told me that she felt especially attracted to a particular Primary Particle Glass Product and pointed at UR-5 MED (fighting sickness). She really didn't know anything about what each Glass Product does and I was happy to tell her that she had intuitively chosen the right one for her present condition. She asked me whether it would be possible to include MED in our planned energy work and in our meditation. She placed MED onto her Heart Chakra and put her hands around it. During the meditation it turned really hot. At the end of the treatment she was very adamant that I had to sell MED to her. (...)

She said her little daughter was suffering from a cold and that she wanted to put MED under her pillow. A moment before she left me, her eyes wandered over to my Primary Particle Beamer that I had placed on the table next to us. I had pointed the beamer towards her just before the meditation, while she was lying on the meditation bed. Without her knowledge I had asked it for assistance. She looked at the Primary Particle Beamer and told me that she could sense a strong energy originating from the beamer. Isn't it great when certain people feel this positive energy so clearly?

#### *House GEO*

It emits a strong energy. I can feel how it floods through my body. After some time this energy softens. GEO is an energy power station: It constantly emits energy. By doing so, it creates its own energy field with its own radius. Geo does not affect our souls. It helps us by manifesting a field in which neutral energy flows.

Its strength is its neutrality. (...)

#### *The cube ELO*

Unlike GEO the cube does not create a circular energy field with a radius. ELO's energy is emitted in the shape of energy beams that are like threads. It harmonises any negative energy exposure that affects our bodies. It frees us from energy attacks which taunt our bodies. As a result we feel lighter, freer and more relaxed.

#### *The six corner pyramid GER*

This pyramid communicates with the soul. It will make you feel good and it opens your heart. It will bring you joy and optimism. GER helps us leaving old unfinished business peacefully behind us. It helps us to lighten our load, while enabling us to learn how to let go, so that we are able to receive peace.

The pyramid is effective and powerful. It works on our bodies through our souls.

#### *Four corner pyramid MED*

I feel surrounded and covered by a soft and tender energy. Both soul and body react to this energy. Both are encouraged to harmonically

restructure. MED's energy nourishes and harmonises. It wraps itself round our bodies like a protective layer. Gentle love is being irradiated. This energy addresses the inner child.

#### *Cone AUF*

This energy helps us to straighten out and to turn to the light. When we fall into disharmony, this energy will always prop us up. It will always return us to our inner cores and help us to stay centred so that we never lose sight of the right path. (...) AUF is a reliable and constant guide on our journey. (...)

#### *Tetrahedron TET*

Warmth flows down my spine. The Crown Chakra is the origin of this divine energy. It is like an axis that connects us with God on one hand and with the Earth on the other. (...)

#### **Rolf K.**

My last order included amongst other items the UR-5 MED, which was a present for my-mother-in-law. Three years ago she had been diagnosed with bladder cancer. The tumour was successfully removed. When she went to a routine check up a couple of weeks ago, the medical practitioner had some damning news for her in store. Her whole stomach was filled with metastasis. Moreover a further tumour had developed, which was visibly as big as a man's fist and caused her extreme pain. After we had presented my mother-in-law with the pyramid MED, the swelling of the tumour reduced by 90% and the excruciating pains were gone. She followed her instincts in how to use the pyramid and always placed MED on the particular spot that hurt most and pressed it down softly. These days she puts the pyramid on her abdomen each night. Two weeks ago she went to a health resort. Yesterday she had another check up, as the plan was to operate on her as soon as she is back from the resort. O what miracle – the check up showed that the tumour is no longer detectable and all the metastasis had disappeared completely. The medical adviser can't explain how this is possible and my mother-in-law does no longer have to go into surgery. Can you imagine, what weight was

lifted off our shoulders. Especially after we were first told that she would die before the year was out.

**Elfriede B.**

I would like to share my experiences about the Primary Particle Glass Product GEO with you. Although I am an ardent follower of Feng Shui and re-arranged my flat accordingly, I never felt completely comfortable in my flat. We did tests and had to realise that we were still affected by an underground water course. This led me to try the Primary Particle Glass Product GEO. Since I received it, much has changed in my life and I am convinced that GEO has contributed its fair share to bringing about these changes.

I feel really good about myself and I am sure that I can sustain this feeling for a long time.

A friend of mine can't breathe at night and stopped breathing altogether on several occasions. He had to rely on a breathing machine. I decided to give him two GEOs as a present. He put one in his office and the other in his bedroom. He also started doing exercises to strengthen the muscles in his neck. When I asked, how he was getting on a few months later, I was told that he now manages to sleep well without the breathing machine. Of course he is quite impressed with it all.

The dachshund of my relatives had become very inactive and refused to go out. It just lazed about in its basket all day long and couldn't even be asked to come out to greet its owners. Since I gave them the Primary Particle Glass Product GEO the dog's fitness and attitude has improved greatly. Walking the dog for an hour or longer is no longer a problem. I also have the feeling that all family members have benefited from the Primary Particle Glass Product. When I ask them however, if they can feel the effect GEO has on them, they seem to have forgotten about its existence. (...)

I am a real fan of your products. I am very happy to have discovered a company that takes their human relations very seriously.

# Primary Particle Garden Blessing

## **Margitta W. and Kosima S.**

Just two weeks after we had placed the Primary Particle Garden Blessing in the centre of our garden, we noticed the first changes. Our plants grew rapidly and on less water and our trees started developing leaves very early on in the year despite this year's hard and drawn out winter. Our rhododendron has grown an inch or two and has developed firm, juicy leaves. Our neighbours on the other hand are complaining that their rhododendron leaves are rather floppy this year. Our bird house has attracted a wealth of birds this winter. The feeling of security and of being safe has descended onto our property – unwanted people seem to feel uncomfortable and often leave after only a short time.

Shortly after receiving the Primary Particle Garden Blessing we started to relax and had the urge to sleep a lot.

The Garden Blessing seems to intensify the needs and desires of our visitors. If they need sleep, they suddenly feel very tired; if they secretly want to stop eating meat, they publicly announce that they want to become vegetarians and those visitors, who suffer from some kind of illness, intuitively sit close to the Garden Blessing. Our pets have become active and alert like never before and we have lost our negative feelings about the future. We have perspectives and aims.

We would like to thank you for these nice experiences. Your products have enriched our lives. They have a really positive energy, which you can feel and which we appreciate.

## **John E.**

I received the Primary Particle Garden Blessing on 08. 12. 05. At first I was very surprised about it being much darker than my Primary Particle House Blessing. When I focused my thoughts on the garden, I became all centred. It seems to be a great meditation tool. Since I placed the glass ball next to our tree that I've called

Veronica, she started looking really healthy (...) and is no comparison to before, when I still had her in my old garden as a sapling. She has developed strong leaves and nice blossoms. (...)

In the last year I have hardly done anything in the garden. We wanted to restyle it somehow, yet we had no clear perception of how we wanted the garden to look like. Either the time didn't seem right to do anything, the garden centre didn't have the right materials or we argued over how to do things. Since the arrival of the Garden Blessing the image of how the garden has to look like is becoming much clearer. It's strange, but the garden will look completely different to what we thought we wanted it to look like last year.

### **Anne G.**

I would like to share my experiences about the Primary Particle Garden Blessing with you. I have put the Garden Blessing in my garden that is situated just outside of the town, where I have been living, since the beginning of last year. There is a wonderful cherry tree in our garden. It is my favourite amongst all of our plants. Due to the lack of water during the heat wave two summers ago, the tree suffered enormously. (...) Even last year the tree had not recovered yet and only produced a few leaves which were weak and looked a pitiful mess. We had hardly any cherries either that year. Our neighbour, who knows his trees very well, assured us that the tree was beyond any hope.

After the Primary Particle Garden Blessing had arrived, the tree started to have many lush, green leaves and even more blossoms, which are slowly turning into little fruits.

Also our shrubs are doing exceptionally well. (...) The butterfly tree (...) that hasn't shown any growth for the last four years, as I was told by my predecessor, seems to explode and is three times as thick as last year.

**Inka N.**

Here follows an account on my experiences with the Primary Particle Beamer.

I have noticed that my roses no longer show any sign of infestation. (...) Normally my rocket salad gets eaten up by insects ever year. Not this year! My rocket is healthy and sound. My common mullein was always plagued by mildew, which sometimes lead them to perish. This year there is no sign of any mildew.

I am very happy that I am the owner of this glass ball. Not only is it really affective, it is also very attractive.

**Stephanie H.**

I got myself a Primary Particle Garden Blessing. The garden feels much more peaceful now. Unfortunately I find it very difficult to explain.

In our garden there is a certain area which plants seem to find quite difficult to colonise. Two energy lines come together here, a positive and a negative one. (...) Most of the rhododendron we planted there two years ago has perished. Luckily one plant survived, although it looked like it was close to death's door only last year. Now it is recovered and in full bloom. It looks much healthier now. The apple tree we planted there also, shows no sign of giving up either. Our fruit trees never bore much fruit, perhaps five apples in one year, yet never more. This year it is a completely different story. However the weather might have helped the Garden Blessing a little.

**Renate S.**

When I broke my arm in March, I suddenly had a lot of time on my hand. Having made myself comfortable on my terrace with the whole garden in full view, I used this time to observe the changes that the Primary Particle Garden Blessing induced.

I was planning to throw my old rose trees on the compost. This year however they seem to have rejuvenated and have developed my blossoms.

My magnolia-tree (my favourite plant; I even talk to it quite often) has, despite its young age, also had many blossoms. The rhododendron is in full bloom. Every visitor admires our front garden because of it. Our pets (five cats, one dog and two hedgehogs) get on really well and play together on the lawn.

Quite recently our male hedgehog stood in front of his hut that we had built for him and his family for the winter. He then proceeded across a flower bed, stretched, rolled around, cleaned himself and smacked. I have never experienced anything like it. I am convinced that the Garden Blessing truly is a blessing.

### **Rosemarie P.**

When I came home holding the parcel in my hands which contained the Primary Particle Garden Blessing, it felt like Christmas. I was very optimistic and full of joy over the fact that the Garden Blessing and its Primary Particle Energy would benefit and protect all the plants, animals, natural beings and creatures and human visitors in our garden and beyond- now and for ever.

I placed the glass ball on the stairs leading to our front door and I can't wait for spring and summer to arrive, when you can feel and see all the changes happening. (...) In close proximity to our house there is a radio transmission mast. For a long time now I have searched low and high for something that would help us and shelter us. Now help has arrived. I can already detect small changes. For example, I feel protected. No unwanted visitors descend upon me. I am very joyful.

### **Roland G.**

I bought the Primary Particle Garden Blessing in early January. The plants in our garden had to put up with a lot this year due to the cold winter and the facade restoration of my house. Yet all have pulled through. Although we live in the hills and it can get mighty cold, our montbrelie has even doubled in size. Our English Rose, which I had already given up hope on, has re-emerged.

The most astonishing of all is however that the girl, who we are renting a flat to, has decided to help us with the upkeep of the garden. In the part of the garden, which she looks after, the shrubs are developing nicely. Even the Lady's slipper is bigger and stronger than ever.

### **Alfred L.**

Early in January I found the Primary Particle Garden Blessing a nice place on my walled terrace, which faces the garden. What I've noticed so far? Well, I have hardly got any snails in my garden. Every year I had to go on a snail collection in the morning and the evening. This year, however, I didn't have go on a snails hunt once yet. All of my plant seeds successfully rooted, which wasn't the case every year.

Unfortunately I can't share any more experiences with you yet, as it is still early in the year.

### **Ina H.**

We were sent our Garden Blessing on 11.01.06.

We kept it in our living room for the time-being, as the garden was covered with snow. Immediately after we did so, the air in the living room felt lighter. Because of the large quantities of snow, we decided to find a nice spot for the Garden Blessing in our yard in front of the bathroom window.

24.01.06 - We noticed that the humidity in the bathroom had decreased a lot. On 03.03.06 we placed the Garden Blessing next to our blue spruce. Soon there were a lot of changes. We could watch our garden green. Our little cherry tree that was struggling over the last two years started to have a growth spurt. Even our peony had about eight flower buds and that's a first! (...) All in all my trees look greater than they did before. They all were in full bloom and have developed nice fruit buds. (...)

Our neighbour owns an old, unpleasant and decrepit barn. Last April he decided to get rid of it. He then turned the patch, where the barn used to be, into a nice piece of lawn. Now he's got himself a couple

of sheep that are grazing the patch and we are finally able to enjoy the morning sun. I am sure we will make many more pleasant discoveries. The winter was very long this year and there just hasn't been the time for more to happen.

### **Isabella W.**

As soon as the weather improved, I put my Garden Blessing out in the garden on my special Buddha energy spot. Since then this area of my garden has become even more pleasant.

My whole garden is in full bloom. All the shrubs which I originally wanted to through out, as they were always struggling, recovered wonderfully. Our 35 years old cherry tree never developed as many blossoms before and I am sure that they will all turn into nice cherries.

Our quince trees are a miracle of blossom-power. I am only afraid that the trees might suffer under the weight of the fruit later on in the year. So far I did not have to treat the roses, which are normally infested with mildew. Yet this year there are no plant lice, no mildew and no other infestations. Both leaves and blossoms are juice and strong.

The lawn always was a bit of a problem. Now though, it is denser and I didn't even have to fertilise it. It is much more fun to work in the garden. And I am more and more drawn to it. And this year, there is much more work to do in the garden as a result of everything growing so well and - with such speed. Anything that is withered needs to be disposed of. You can see, there is much to do.

I am very happy and enthusiastic, because I own such an energetically strong Primary Particle Garden Blessing ball with all its helpers. I am very excited to see, what else the glass ball can do.

# Primary Particle House Blessing

## **Carola A.**

I own the Primary Particle House Blessing since 13<sup>th</sup> January. I immediately felt a comforting, pleasant and nearly affectionate prickle all over my body. I was feeling exceptionally warm and my cheeks had turned red. This strong feeling ceased after a couple of hours. Since this day much has changed in my life.

People, who are in a hurry, become calmer, when they visit us. We then just sit down and do not notice, how time passes. Generally people have calmed down in our house. Suddenly they seem to have all the time in the world on their hands. This is also true for my family and me. Sometimes it seems, as if time stood still. It is wonderful, if I can stay at home and do not need to go out. Finally it is replenishing to stay in. (...) In my house I give energy-treatments and massages and I work with flower essences. The clients are much more relaxed and it is easier for them to slip into a meditative state. However - or perhaps it is a blessing – arguments in the family come out earlier and climax quicker. Suppressed and negative feelings can no longer stand between us and demand to be dealt with immediately.

My verdict:

The Primary Particle House Blessing truly is a blessing. It leads us to love and harmony. It dissolves old negative behavioural patterns, slows down time and allows us to relax quicker.

## **John H.**

I bought the Primary Particle House Blessing for a patient of mine, an elderly lady. She lives in a block of flats in Munich. All around her there are telephone masts. She is highly sensitive to electro-smog and had a physical and psychological brake down a couple of weeks ago.

(...) A mental reflection showed that the Primary Particle House Blessing could be very beneficial to her. I have been working with

spiritual energies for a long time now. (...) I received the Primary Particle House Blessing on 12/12/05. Due to a lack of time, I only had the chance to quickly feel for the energy. Immediately there is a prickle, which moves up the arms until it reaches the head and makes the Crown Chakra open up. The ball feels a little like an amethyst. I then left it in its wrapping in the kitchen. After a few days my wife and I woke up during the night. I could feel a high frequency-energy. (...) I took the House Blessing out of its packaging on 18.12.05 and did some rigorous testing on it. Once I connected to it mentally, it seemed to take about ten minutes to reach its peak efficiency. The Primary Particle House Blessing seems to be activated by sun light. The area in which the Primary House Blessing is active, reaches up to the outer walls, where they join the neighbour's walls. (...) I managed to measure two million Bovis units. This is to all intents and purposes well within the range of angels or elevated natural spirits. In order to further test out the ball's potency, I placed the glass ball in the hallway, a central location. In the days that followed I noticed a subtle vibrancy that seemed to purify all the energy in the house. (...) Negative energy patterns caused by people and negative energy beings were transformed and the Primary Particle House Blessing created a distinctly clear and subtle energy. In the first few days my wife could hardly sleep. She saw spirit-beings in the living room, where the windows are. Yet she could not quite relate them to anything she had seen before. (...)

On December 27<sup>th</sup> I wrapped the House Blessing up again and delivered it to my patient, the elderly lady, who lives in Munich. Again the Primary Particle House Blessing was placed centrally in the hallway of her flat on a sideboard. First I could not detect any noticeable change. After a couple of hours I was unable to detect any negative effects from mobile telephones.

Today, it is February 2<sup>nd</sup>, I received a telephone call from the elderly lady. She is very pleased with the Primary Particle House Blessing. Her health has improved immensely and she would like to get herself a second House Blessing.

## **Lothar H.**

Soon after I positioned the Primary Particle House Blessing in my house, I could detect a strange 'freshness' in the room, which slowly extended to the other rooms. I am working as at Reiki instructor and have fifteen years of experience in training students. In addition to my Reiki work I am also a teacher for spiritual healing. The feeling of freshness that I felt was similar to the experiences I have made during Reiki 2 seminars, in which we teach how to purify rooms energetically. After such a process the stagnant energies, which are normally trapped in the corners of the room, start flowing again. My students are normally led to believe that someone has opened the windows, although this is of course never the case. I hold my seminars in a different house. My students stay there for the night as well. This time I brought the Primary Particle House Blessing along and placed it in the seminar room without telling any of the students before the two days course started. (...)

Since I am in the possession of the Primary Particle House Blessing, negative energies were unable to get a hold on my patients. The Primary Particle House Blessing has assisted my work in particular with one man, whom I have known and worked with for a very long time. This man has now bought his own House Blessing. A different patient of mine, who was born with physical disabilities, has always been anxious, insecure and doubtful of the good in people. When he was promoted, the situation got worst. With the help of the Primary Particle House Blessing he became mentally very strong in an astonishingly short time. He himself believes that the House Blessing is aiding this development. (...)

I can only verify that the Primary Particle House Blessing assists the therapist in his/her work. At the same time the House Blessing creates a first class energy field that radiates through the house. The seminar group is alert for much longer and the students are more attentive and manage to keep a clear head for much longer. The overall atmosphere in the house in which the sleeping facilities are

located has improved many times over. The students fall asleep earlier, their sleep is deeper and in the morning everyone is fitter.

**Gerlinde B.**

Buying the Primary Particle House Blessing was a decision I have made consciously. When I unpacked it from its wrapping, I felt a strong energy radiating towards me. Like a spiral it spread from my heart to all sides. This feeling made me very happy. I felt that the Primary Particle House Blessing wanted to be positioned next to my large rock crystal in our living room. The first night was marked by deep sleep. We were all much recuperated in the morning. However, from the second night onwards I suffered from very vivid dreams. At the same time I started to develop pains in my joints. I believe the Primary Particle House Blessing is a real delight and blessing for our house, because, since it arrived, numerous things happened that have touched me deep inside. My further education is finally going the way as I wanted it to. Angels are becoming increasingly more important to me. I am discovering new books (...). After fourteen days I had the strange feeling that the House Blessing and the Garden Blessing form one unit and belong together. It is strange but my life is getting more and more exciting and – nicer! Thank you very much for these wonderful glass blessings.

**Wilma R.**

When the Primary Particle House Blessing came to me on December 7<sup>th</sup>, much joy and blessedness entered my life. (...) I have achieved inner peace, so that I can approach many things that life seems to have in store for us with courage and with conviction. (...) Since the first day of the House Blessing's arrival, I noticed many changes. On the floor beneath me on the left hand side there is a family with two children. The adults argued at least twice a week, even if it was late at night. They kept screaming at each other with such loud voices that I could not sleep. Even after they had finished, the agitation kept

me awake. Since the arrival of the Primary Particle House Blessing there have been no fights between them.

I have also noticed that I am less susceptible to the cold. Despite heating my bedroom, I always found it rather cold. Although I heat the room less now, I no longer find it unpleasant to be in the room. As I have positioned the Primary Particle Blessing glass ball in my bedroom, I wake up completely refreshed and in a good mood. Whenever I wake up during the night I am now capable of meditating. (...)

All of that makes me very happy and I would like to share this sense of happiness with other people. (...) I am very excited to find out what other changes the Primary Particle House Blessing has in store for me.

### **Angelika L.-R.**

I found it very difficult to put my impressions down on paper. As always, I had again waited for something amazing to happen. By doing this, I did not manage to pick up that the sensations had started to be played out, as soon as I had unwrapped the Primary Particle House Blessing. We were right in the middle of our stressful Christmas preparations. Things weren't going right between my partner and me either and my health suffered. I was about to blow. I only wished for everything to clear itself up and that the situation would loosen up a little. I had heard that wishes can quite literally come true, yet I had never experienced it myself. An all encompassing process of clarification and resolution started to come into force.

The Christmas period was less stressful than in the years before. Our pets, a cat and a dog, had become quieter and much more docile. After twenty years my Aloe Vera plant finally developed blossoms. My mother-in-law, who is 82 years old, does not depend on her medication any more. My husband suddenly developed an esoteric awareness, something that I had desperately waited for to take place for a very long time. (...) Personally I could resolve many philosophical and esoteric questions that had bothered me for ages.

I had heard that with some energy products, things first can get worst, before they improve. This was very much the case with the Primary Particle House Blessing. I know however that after the process of cleansing has been completed, everything will be clearer and more structured.

## Other Products

### **Tuoc P.**

Just a happy note to inform you that my order of the two Converters and the Primary Particle Discs have arrived. Please extend my heartfelt thanks to your colleague, Peter, and the whole team for the love and care they imbued into the Converters. They are so beautiful and the aroma scent from the wood is so refreshing and magical! It was coincidental that a colleague of mine just came to my office and asked me about the movie "The Davinci Code" and about the Holy Grail. He asked me what the Holy Grail was to me. I pointed to the package arriving from Wu-Wei and said, "That's the Holy Grail, if you asked me," and I went on giving him a whole entire lecture on Pure Love Energy and Primary Particles. I can't thank you enough for educating me in this field of engineering Love and Consciousness and for spreading these tools to the rest of the world. It is with great blessings to see that more and more of us can be reminded, through your products, of who we really are and recognize our divine essence within.

### **Elfriede B.**

My experiences with the Primary Particle Stop Smoking Disk. It is eight weeks to the day that I started to place the Primary Particle Stop Smoking Disk into each new cigarette packet. My fears that I would chuck the Primary Particle Stop Smoking Disk away with the empty packets were thankfully unfounded. In the beginning I was waiting for some big changes. Perhaps the cigarettes would taste differently which would then keep me from lighting up or perhaps I would feel violently sick after each cigarette. Yet nothing like that happened. (...) Due to the increased weight of the cigarette packet, I was constantly reminded that I wanted to stop smoking, whenever I grabbed for it. As a result I could spontaneously decide against having another one. (...) I soon smoked six to seven cigarettes less a

day. Every time I opened the cigarette packet, I asked myself: “Do I really need one now?” I did not get nervous, if I couldn’t light up for an hour or so, whenever I visited my friends who, of course, don’t smoke. I even managed to go without one for four hours, despite consuming alcohol at a non-smoking friend’s brunch-do. I was very impressed with myself. (...) I used to smoke 1.5 packets per day; that is between 20 and 25 cigarettes. Now I am down to about 17 a day. It is my short term aim to end the day with a couple of cigarettes left in the packet. (...) I used to always have three to four packets stored away for a rainy day, so to speak, which I don’t anymore. I also don’t have the urge to take a packet with me wherever I go. I started questioning and consequently reducing “ritualistic” cigarettes. I have become much more realistic, when setting myself aims, which I now can reach.

### **Harm K.**

Feed Back on the Wu-Wei Tree Acid Foot Pads.

What are these Wu-Wei Tree Acid Foot Pads all about, I wondered. Do they really work? Can they detox the body and draw out all sorts of poison? My wife and I have tried them and tested their properties radioaesthetically. I would like to share my findings with you. With my V-shaped dowsing rod, the tip of which was carefully covered with the excretion that came from used plasters, I tested against a long list of harmful substances and substance groups in order to see, if they were present. Here is what I have found:

#### **1st plaster**

E 637  
Bisphenole  
E 578  
E 407  
Dimethylacerylate  
Gluten  
Imidazole

#### **8th plaster**

Barbiturate  
Bisphenole  
E 578  
Diuren  
Gluten  
Artificial aroma-substances  
E 472

Isopropanol	E 232
Artificial aroma-substances	Nonan
Headache tablets	E 219
Kresol compounds	
E 160	
E 472	
Nonan	

**15th plaster**

E 578  
 Diuren  
 Gluten  
 Artificial aroma-substances  
 E 472  
 E 218  
 E 219

**25th plaster**

Diuren  
 E 472  
 Nonan E 218  
 E 219

**30th plaster**

Nonan  
 Artificial aroma-substances  
 E 218

When I tested a plaster which we hadn't used yet, I got no reaction to any of the above listed substances.

What do these findings mean?

The plasters actually draw out poison via the feet until the total amount of poison has been depleted, as long as it is not bound to any connective tissue or organs. The poisons contained in the connective tissues can apparently only be withdrawn, once the overall level of pollution within the body has been lowered. It is noteworthy that we found so many E-numbers and food enhancers. As we have followed a vegetarian life style for the last six years, it can only be pollution from before that time. It is remarkable, how long these substances stay in the system. As they are alien to any organism, our bodies do not seem to be able to entirely get rid of them without outside help. We can only but assume that after a longer break the substances that

are now bound, will detach themselves and can, together with other substances, be drawn out with further application.

We are convinced that this method of detoxication is very gentle. The detoxication process through the skin of the feet does only mildly affect your liver and has no negative effect on your kidneys. We now have the certainty that the Wu-Wei Tree Acid Foot Pads work and we can recommend them to anyone, who wants to use them.

**Kandi M.**

Many thanks for the chance to try the WU-WEI Tree Acid Foot Pads with Tourmaline.

They have helped me immensely.

The area being improved most is a lumpectomy operation scar, an area that has been sore since 1998, causing problems with sleeping, as I was only able to lie down in one position due to the pain. (...) After 60 days of these wonderful pads, the pain has gone and I feel on top of the world - I shall recommend them to all, who need them - as I feel my old self again.

**Margareta B.**

(...) I have been working with the new ORa Orgon Beamer for about a year now. I phoned Mr Weigerstorfer in order to get some new impulses. I used to own an old Orgon Beamer that I never used. (...) Much has changed especially in the area of transmitters. Shortly after, I received the Standard Ampoule. In my attempt to get back into using the ORa Orgon Beamer, I placed it on the table in front of me and started reading a book. Behind the beamer I placed a container, into which I put the transmitter Standard Ampoule. Within a very short time I fell asleep over my book. However, it was not that kind of tiredness which you feel after a long night. It felt completely different. The next day I had a bit of a lay down on the sofa, while the ORa Orgon Beamer was facing me and immediately I fell into a deep sleep again. Now I irradiated myself during the night. I slept for

eight to nine hours without waking up. In the morning I felt extremely refreshed. A few days later I geared up for the big test: When I went to bed, I deliberately did not point the ORa Orgon Beamer at myself. Again I had a disrupted sleep pattern: I woke up several times and had to go to the toilet, etc.

I then experimented with the beamer. I attached a note to the transmitter (= Standard Ampoule) containing a wish. On another occasion I used the transmitter without the note.

It is interesting that those nights were not quite as refreshing, when I had attached things to the beamer and I couldn't sleep as long.

I will continue to conduct simple experiments, because I am sure that I will make some more positive discoveries. It makes me very happy that I have found something that helps me to find a normal sleep pattern.

### **Virginie D.**

(...) Mirror suppressors, those are impressive as well. They are excellent for clearing situations and life issues and bring them softly to their best (conclusions). You can either put them on a mirror or even put them on yourself! They have a very powerful effect. And the Primary Particle Discs are great for food, changing the taste of any foods and beverages. They work while you are sleeping and ease pains like stomach pains, when you have eaten too much!

They refresh beverages. (...) Just put them on a violet disc. Also - as the violet discs are put in the middle of the fridge, the fridge temperature cools down. It is amazing and a great gain in your energy consumption. Many thanks to your boss for these improvements and for helping mankind and thanks to you for helping to spread them.

## **Other Publication by Lena Lieblich**

### **Lena Lieblich** *Little Pendulum School*

The Little Pendulum School has been created for all the people who are absolute beginners at using the pendulum, yet would like to learn how to do so quickly and effectively.

The Set consists of ten cards and one Mini-Pendulum. Each card covers an aspect of how to use the pendulum and can be seen as a self-contained lesson. After successful completion of all ten lessons, you will be able to deal with most pendulum-situations.

### **Lena Lieblich** *The Most Important Pendulum Tables*

This collection of twenty-nine pendulum tables is very user-friendly. All tables are designed by Lena Lieblich, who can look back on several years of experience with pendulums.

On one hand this selection enables the pendulum user to get the most out of his/her pendulum. On the other hand it offers structure to anybody's pendulum work.

The tables are the result of real pendulum-situations. Among others you will find the following tables in Lena Lieblich's booklet: Quantity and percentages tables, energy tables, colour and transmitter tables, Bach Remedy tables, health and illness tables, one sources of mistakes table, time tables, relaxation tables and precious stones tables.
